## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Steiner. Note Figure 2 showing scraper ring (36) in a groove (38) formed in the valve guide (32) and column 2, lines 2-51.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 2-4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steiner in view of Smith et al. Steiner discloses the claimed invention except for the valve stem having a reduced portion in contact with a scraper and that the valve is an EGR valve. Smith et al teaches that it is old in the art to provide a valve stem having a reduced portion in contact with a scraper and that the valve is an EGR valve as shown in Figure 2. It would have been obvious for one having ordinary skill in the art at the time the invention was made to modify the valve arrangement of Steiner by providing a valve stem having a reduced portion in contact with a scraper and that the valve is an EGR valve as taught by Smith et al in order to provide better contact between the scraper and the valve stem.

***Allowable Subject Matter***

Claims 7-14 are allowed.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references of Masuda and Bircann et al are cited to show scrapers for EGR valves. The references of Chana and Feucht et al are cited to show hydraulic actuated EGR valves.
